PROFESSIONAL SUMMARY

UI/UX and Product Designer with 4+ years of experience (including internship) designing enterprise, healthcare, and consumer products. Distinctive hybrid profile combining Figma-based design systems expertise with hands-on front-end implementation (Angular, PrimeNG, PrimeFlex, HTML5, CSS3). Proven across the full product design lifecycle: information architecture, user journey mapping, wireframing, high-fidelity prototyping, and developer handoff. Built scalable component libraries, design tokens, and auto-layout systems that keep design and engineering in sync. Shipped 100+ production screens across hospital, laboratory, quality-management, and consumer messaging applications, improving usability, WCAG 2.1 accessibility, and design-to-development velocity in Agile, cross-functional teams.

CORE SKILLS

Design & Prototyping: Figma (auto-layout, variables, design tokens, component libraries), Adobe XD, Adobe Photoshop, Adobe Illustrator, Draw.io, AI-assisted design workflows

UX Methods: Information architecture, user journey mapping, user flows, wireframing, usability testing, design thinking

Design Systems: Component libraries, style guides, design tokens, variables, developer handoff documentation

Front-End Development: HTML5, CSS3, Bootstrap, Angular, PrimeNG, PrimeFlex

Accessibility & QA: WCAG 2.1, inclusive design, cross-device QA, cross-browser testing

Visual & Interaction Design: Interaction design, visual design, mobile app design, dashboard design, responsive web design

Collaboration: Agile/Scrum, cross-functional teams, stakeholder presentations, developer collaboration

Brand Design: Logo design, brand identity, typography, print and social media design

WORK EXPERIENCE

UI/UX Designer & Web Designer - Suvarna Technosoft Pvt. Ltd., Hyderabad

April 2023 - Present

HIMS - Hospital Information Management System (Figma, HTML5, Bootstrap)

- Led end-to-end UI/UX design for a large-scale hospital management system: 60+ modular enterprise screens across patient registration, appointment scheduling, billing, and reporting, using information architecture and user journey mapping to structure complex clinical workflows.
- Designed responsive, WCAG 2.1-compliant clinical and administrative dashboards, improving workflow efficiency and real-time data visibility; reduced average task completion time by 20%.
- Established a unified design language and reusable component library with documented design tokens and variables, ensuring visual consistency across all modules and cutting developer handoff cycles by 30%.
- Partnered with developers, QA engineers, and stakeholders to deliver all modules on schedule and to specification.

DICOM - Responsive Web Application (HTML5, CSS3, Bootstrap, Figma, Adobe XD)

- Architected and built fully responsive web interfaces with HTML5, CSS3, and Bootstrap, achieving cross-browser compatibility across Chrome, Firefox, Safari, and Edge.
- Designed high-fidelity mockups and interactive Figma/Adobe XD prototypes with auto-layout as the single source of truth for engineering.

- Developed and documented a reusable UI component library and style guide, reducing front-end development time for new features by 25%.

MRRCH - Enterprise Web Application (Angular, PrimeNG, PrimeFlex)

- Designed and implemented modular, responsive UI components using PrimeFlex utility classes and the PrimeNG Angular component library, ensuring scalability and maintainability.
- Ran cross-device and cross-browser QA testing to guarantee consistent rendering across desktop, tablet, and mobile viewports.
- Partnered with back-end developers on front-end/API integration, with zero UI-breaking regressions across all release cycles.

SLIMS - Laboratory Information Management System (Figma, Angular)

- Designed end-to-end UI/UX for a laboratory information management system covering sample registration, test order management, result entry, and report generation.
- Created responsive, role-based dashboards for lab technicians and administrators, improving visibility into sample status and turnaround times.
- Built and maintained a reusable component library and style guide aligned with the company-wide design system.
- Collaborated with the Angular team during implementation to ensure pixel-perfect, spec-accurate delivery through structured developer handoff documentation.

HQMS - Educare Quality Management System (Angular, PrimeNG, PrimeFlex, Figma)

- Designed UI/UX for an education-sector quality management platform covering academic record tracking, compliance reporting, and institutional performance dashboards.
- Built modular, responsive UI components with PrimeFlex and PrimeNG, consistent with other Angular-based products in the portfolio.
- Conducted cross-device and cross-browser QA testing; partnered with back-end developers on front-end/API integration, preserving pixel-perfect fidelity between Figma designs and shipped Angular components.

Intalk - Consumer Mobile Application (Figma)

- Designed end-to-end UX for a consumer mobile app: 40+ screens covering onboarding, real-time messaging, and profile management, mapped through detailed user journey mapping.
- Developed user flows, wireframes, and interactive prototypes that reduced developer clarification cycles by 15%.
- Partnered with engineering during implementation reviews to ensure full design-spec adherence.

Fontana Pharmacy - Healthcare Mobile Application (Figma)

- Designed an intuitive customer-facing mobile app for a pharmacy platform, optimizing prescription ordering and refill workflows; improved task completion rates by 18%.
- Produced wireframes and click-through prototypes for stakeholder presentations, accelerating design sign-off and shortening review cycles.
- Maintained a consistent component library across all screens, reducing design inconsistency and speeding feature iteration.

Brand & Visual Design (all projects)

- Designed logos, custom icons, banners, and UI assets, maintaining cohesive brand identity across all digital touchpoints.
- Produced social media creatives, brochures, flyers, and print collateral for internal and client-facing campaigns.
- Applied current UI/UX trends, WCAG accessibility best practices, and interaction design principles across all deliverables.

UI/UX Design Intern - 9Arts Media, Hyderabad

October 2022 - March 2023

- Designed responsive websites and mobile app interfaces in Figma, delivering polished prototypes aligned with business and user goals.
- Created user flows, wireframes, mockups, and interactive prototypes, translating product requirements into clear, testable design artifacts.
- Collaborated with development teams to ensure pixel-perfect implementation, reducing revision cycles through proactive handoff documentation.
- Iterated on designs based on user feedback and usability findings, applying design-thinking principles to improve usability and task completion.
- Built and maintained reusable design components and enforced design-system consistency standards.
- Joined client discovery meetings and worked with senior designers to align solutions with client objectives and brand guidelines.

EDUCATION

Bachelor of Arts (B.A.), History - Ushodaya Degree College, Chodavaram, Andhra Pradesh, India - 2022
