

A New Era of Solutions...

Engineering & CAD Services for Industrial Projects

Roboclick Infotech is an engineering services company specializing in CAD engineering services, plant engineering and engineering automation solutions for oil & gas, automotive and EPC industries. With over a decade of experience, we help global enterprises improve engineering productivity through AVEVA-based design solutions, digital engineering workflows and industrial automation tools.

CAD Engineering, Plant Design & Engineering Automation Services for EPC Industries

**Oil & Gas
Engineering
Operations**

**Automotive &
eMobility

**IT Software
(SAAS)**

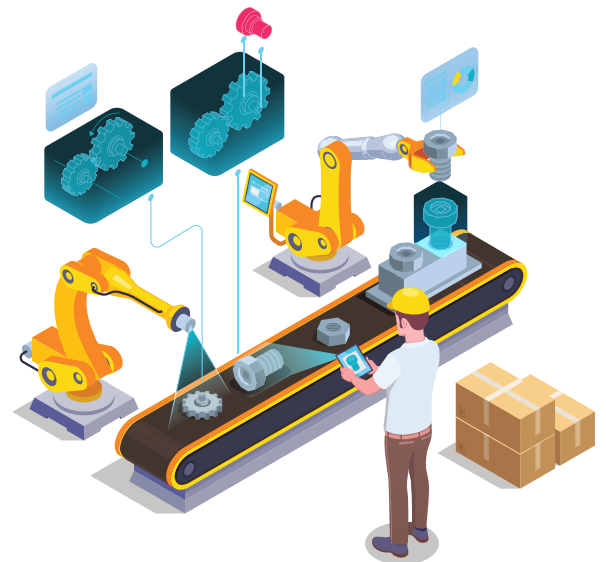

**Workforce &
Talent Solutions**

Our Engineering Services

We provide CAD engineering services, plant design solutions, EPC engineering support and engineering automation services tailored for oil & gas, automotive, manufacturing and industrial infrastructure projects

Product Engineering and Industrial Software Solutions

We provide CAD engineering services, plant design solutions, EPC engineering support and engineering automation services tailored for oil & gas, automotive, manufacturing and industrial infrastructure projects

Plant Design & EPC Engineering Services

We provide plant design and EPC engineering services including piping design, equipment layout and 3D plant modeling for industrial infrastructure projects.

Engineering Automation and CAD Workflow Solutions

Our CAD automation solutions transform repetitive manual design tasks into intelligent engineering workflows, improving engineering productivity and project delivery timelines.

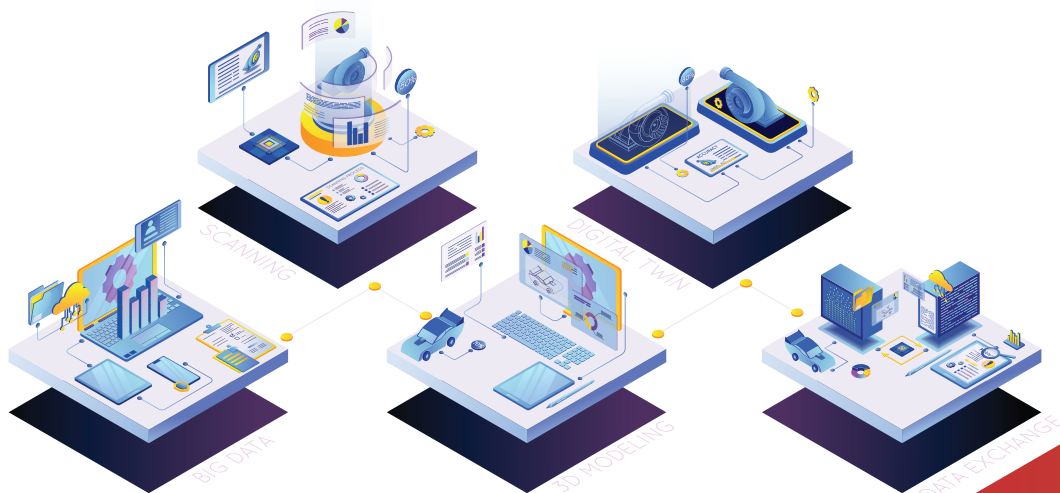

Why Roboclick Infotech

Plant Design, CAD Engineering & Digital Engineering Services for Oil & Gas EPC Industries

Roboclick Infotech Pvt. Ltd. provides plant design services, CAD engineering solutions, SmartPlant Instrumentation (SPI) services and engineering automation support for oil & gas, EPC and industrial infrastructure projects. Our digital engineering solutions improve engineering workflows, project execution and industrial asset lifecycle management.

Products & Platforms

Mechanical Integrity Suit

**CAD Conversion and Engineering
Data Migration Tool**

**RC QC Checker for CAD
Quality Automation**

Industrial Intelligence Isn't the Future - It's Now.

And with AVEVA by our side, we're building it.

As a certified AVEVA Solution Partner, we transform complexity into clarity—from concept to commissioning—utilizing digital engineering capabilities supported by AVEVA software, thereby shaping the future of smart plants and interconnected operations.

We Didn't Just Choose AVEVA - We Choose the Future.

In a sector characterized by narrow margins, expensive downtime, and fragmented data, AVEVA is redefining the standards. Furthermore, we are not merely observing; we are actively engineering the change.

Together: we empower EPCs and asset owners to design smarter, operate faster, and evolve continuously.

We Don't Just Integrate Software. We Deliver Outcomes.
